

THE COLLECTION

more than
ONE MILLION MSDS
all original
50,000 SUPPLIERS
...and growing fast

Possibly the world's most authoritative source of Safety Data Sheets

OVER ONE MILLION SUPPLIER MSDS

- Delivered in the original format – PDF, HTML, Text etc.
- Fully indexed
- Search on:
 - Name, trade name, CAS number, part number and common synonyms, issue date
- Substructure searching now available
- Sort MSDS by:
 - Language
 - Country of origin
 - Issue date
 - Manufacturer/supplier

OVER 50,000 SUPPLIERS

Including most of world's largest manufacturers of:

- Laboratory chemicals
- Lubricants
- Adhesives
- Surface coatings
- Specialty chemicals
- Pharmaceuticals
- Personal care products
- Household products, etc.

MSDS FROM MORE THAN 100 COUNTRIES IN OVER 50 LANGUAGES

Most internationally recognized formats – such as those described in the Globally Harmonized Scheme (GHS - ISO 11014-1) and US ANSI Z400-1. The GHS scheme has or will be adopted throughout Europe, US, Asia and Australia.

25,000 NEW MSDS ADDED MONTHLY

Our researchers, located world-wide, assemble THE COLLECTION using the latest released documents only

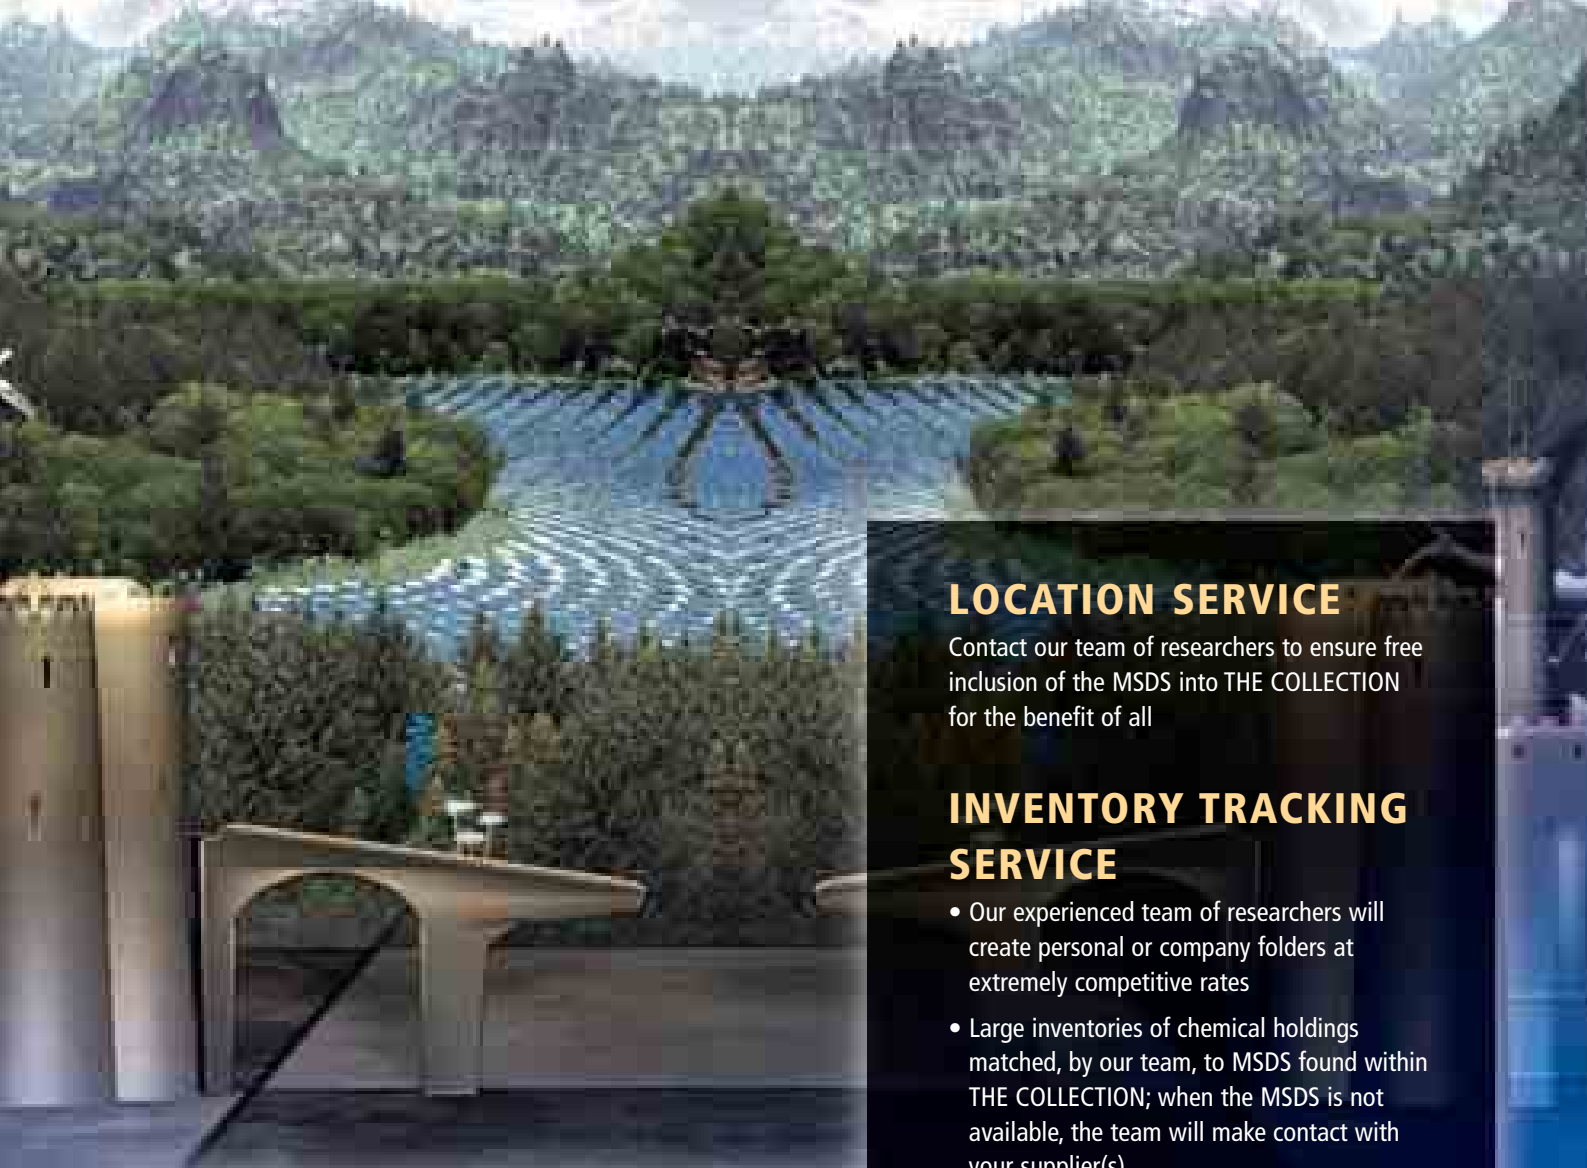

- Many suppliers use THE COLLECTION exclusively to distribute their MSDS to a world-wide audience

OVER 6,000 MSDS UPDATED DAILY

- Document recognition software identifies changes within different versions of MSDS and issues appropriate email alerts

DELIVERED FROM OUR WORLD-WIDE SERVER NETWORK

- Servers located in the US, Australia, the UK and Malaysia ensure efficient and timely broad-band distribution of THE COLLECTION
- Load-sharing between servers ensures little or no down time due to server malfunction

CREATE YOUR OWN PERSONAL or CORPORATE FOLDERS

- Download MSDS of interest from our servers to personal folders on your own computer or to your company WAN/LAN or Intranet and/or
- Maintain (park) your personal or company folders on our secure networked system of servers for subsequent distribution to personal computers, WAN/LAN or company intranet
- Link personal folders directly to:
 - Tracking
 - Risk assessment
 - Labeling software within the Chemwatch suite of applications
- SAP compatible

DAILY E-MAIL ALERTS

Submit personal or corporate folders to our care and attention and receive daily (or monthly if you prefer):

- Notification of updated MSDS
- The actual change of words between two versions of the MSDS
- Email notification to your personal or departmental address or user lists

LOCATION SERVICE

Contact our team of researchers to ensure free inclusion of the MSDS into THE COLLECTION for the benefit of all

INVENTORY TRACKING SERVICE

- Our experienced team of researchers will create personal or company folders at extremely competitive rates
- Large inventories of chemical holdings matched, by our team, to MSDS found within THE COLLECTION; when the MSDS is not available, the team will make contact with your supplier(s)

LINK to CHEMWATCH MODULES

- The Chemwatch chemicals management package comprises a separate suite of applications built on a separate database of 150,000 independently researched MSDS
- After parsing the suppliers' MSDS, users may:
 - Perform risk assessments
 - Track chemicals
 - Create compliance reports
 - Produce labels
 - Produce summaries in more than 20 languages
 - Determine environmental fate
 - Determine toxic endpoints

as mandated by various countries and regulation using Chemwatch modules. (Chemwatch subscription required)

- The rules and regulations of over 30 countries are incorporated into each module
- Visit www.chemwatch.net for additional details

SPECIALIST PARSING TOOL

- Extract data from suppliers' MSDS using a proprietary overlay tool exclusively created for THE COLLECTION
- Use the parsing tool to identify MSDS details which drive the various modules distributed through Chemwatch
- Submit such data to our server and receive risk assessments by return email
- Link the data automatically to the proprietary tracking tool within THE COLLECTION

MOLECULAR MODELS

- THE COLLECTION ships with a VRML viewing tool and access to more than 750,000 3-D molecular structures
- Perform substructure searching using THE COLLECTION's powerful search engine

LINKS to GALLERIA CHEMICA

Link parsed data to GALLERIA CHEMICA's collection of more than 500 separate databases (from over 100 countries) including:

- National inventories
- Occupational exposure standards
- Physical properties
- Spectrographic data
- Environmental fate data
- Full text regulation and legislation
- Regulatory summaries

Separate subscription required for this feature – further details at www.galleriachemica.net

WEEKLY BULLETIN BOARD

- More than fifty pages of information, relevant to the chemicals health and safety professional, delivered weekly by email
- Our researchers review more than 6000 titles weekly in the scientific literature. Information which impacts on the safe use of chemicals is recorded in real time.
- Changes or intended changes to the international regulation of chemicals are reported as soon as they are released by government agencies – from more than 50 countries
- Receive Hazard Alerts of interest to the safety professional

SUPPORT and TRAINING

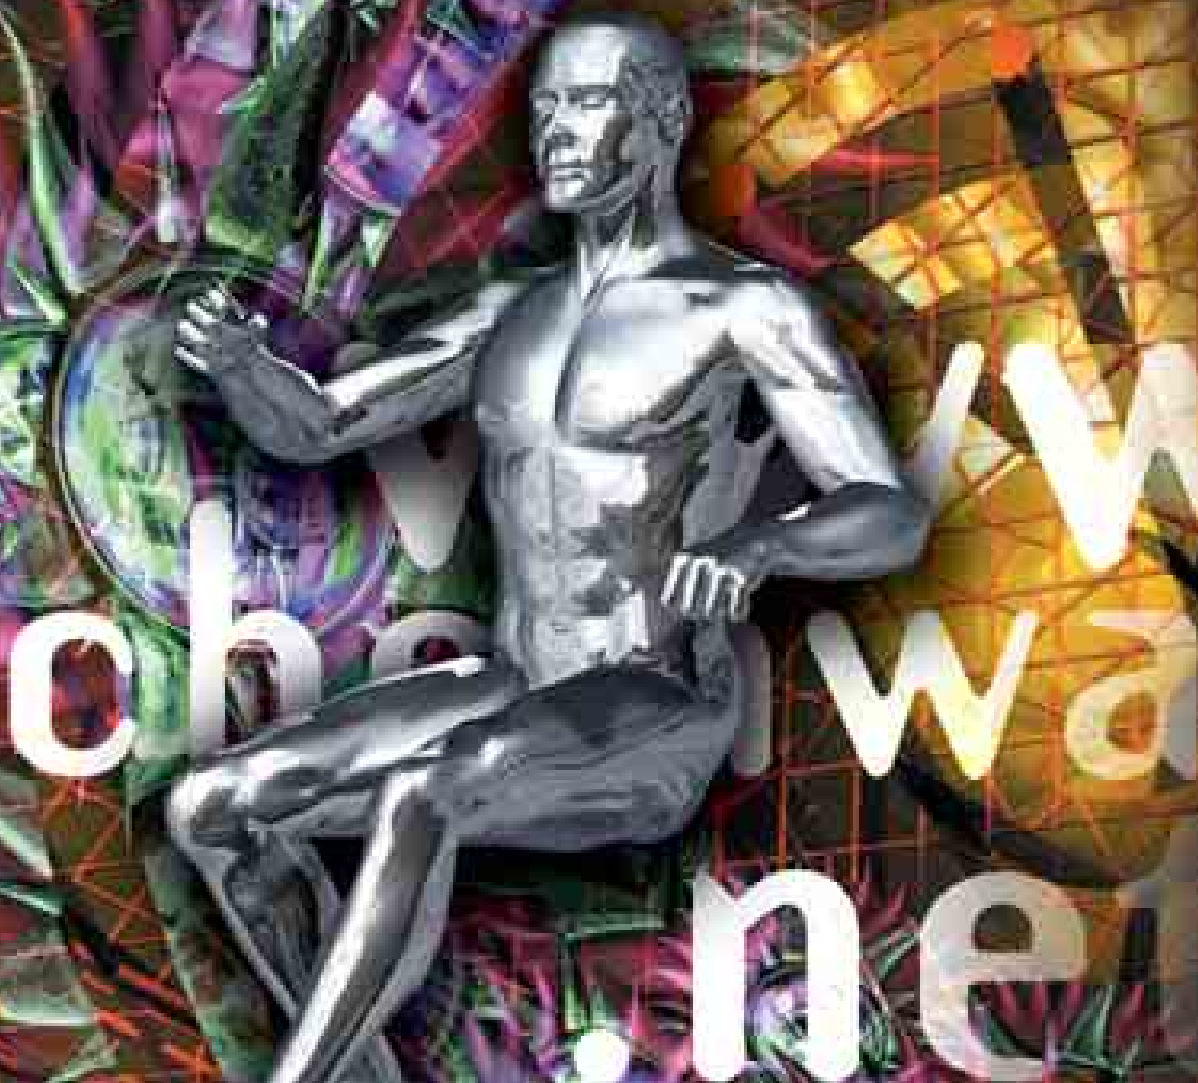

Our team of technical support staff is located throughout the world and available to assist in training aspects related to THE COLLECTION or general chemicals safety training.

- 24-hour, 7-day-per-week technical assistance

24/7 EMERGENCY SERVICE HOT-LINE

- The Emergency Hot-Line is manned by chemists, occupational hygienists and emergency physicians
- Most countries can access a single phone number
- Support available in more than 50 languages including all major European and Asian languages and dialects (including several pidgins)

Contact us at www.msdscollection.net for local support
